

Cyber-Safety & ICT Policy

The measures to ensure the safety of Lambert School community are based on our core values. To assist us to enhance learning through a safe use of information and communication technologies (ICTs), we are now asking you to read this document and sign the attached Use Agreement Form.

The computer network, Internet access facilities, computers and handheld devices bring great benefits to the teaching and learning programs at Lambert School. The ICT equipment is for educational purposes appropriate to the school environment.

The overall goal of Lambert School is to create and maintain a cyber-safety culture that is in keeping with our values and with legislative and professional obligations. The Use agreement includes information about the obligations of the parent, student and the school and the nature of possible consequences associated to breaches that undermine the safety of the school environment. Where a student is suspected of an electronic crime, either with a school device or a personal device, the device may be confiscated and handed over to the police.

While every reasonable effort is made by schools and department administrators to prevent student's exposure to inappropriate content it is not possible to completely eliminate this risk. This especially includes student devices that may not be connected to our network, and therefore we recommend the use of appropriate Internet filtering software at home.

Please contact the school if you have any concerns about your child's safety in using the internet and ICT equipment and devices.
